Applicant(s)

MOONEY ET AL.

Examiner

Srilakshmi K. Kumar

Art Unit

2675

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 February 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-27 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-27 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

The following office action is in response to the request for reconsideration filed on February 19, 2003.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ho et al (GB 2,319,747 A).

As to independent claim 1, Ho et al disclose an electronic wireless badge device (Fig. 1,) comprising, a wireless front end and an electronic display (Fig. 1, item 20) adapted to electronically display badge information received by said wireless front end (Fig. 1, pg. 1, lines 22-34). Ho et al disclose on pg. 3, line 35-pg. 4, line 17, and pg. 6, line 28-pg. 7, line 3, where the displayed information is that of a wearer of said electronic wireless badge device.

As to dependent claim 2, limitations of claim 1, and further comprising where said electronic display is adapted to display any of one of a plurality of different badge information at any one time (on pg. 3, line 35-pg. 4, line 17, and pg. 6, line 28-pg. 7, line 3).

As to dependent claim 5, limitations of claim 1, and further comprising wherein said badge information includes a photo of an authorized wearer (Fig. 1, item 16, pg. 5, lines 25-31).

As to dependent claim 6, limitations of claim 1, and further comprising wherein said electronic display is an LCD device (pg. 3, line 27).

Art Unit: 2675

As to dependent claim 7, limitations of claim 1, and further comprising, a non-volatile memory for storing badge information on said badge display (pg. 3, lines 4-9, pg. 6, lines 8-19).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3, 8, 9, 11-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ho et al (GB 2,319,747 A) in view of Tuttle (US 6,127,917).

As to independent claim 8, limitation of claim 1, and further comprising, a network security station, comprising, a database of badge information corresponding to said authorized user codes; and a wireless front end adapted to transmit badge information retrieved from said database of badge information. Ho et al do not disclose where a network security station comprises a database of badge information corresponding to said authorized user codes. Tuttle discloses an airport security and passenger systems. In col. 17, lines 22-65 and col. 18, lines 17-48, Tuttle discloses a wireless transponder device such as a smart card, which stores passenger information. The smart card encompasses a magnetic strip for storing information, which is then read by a reader at a gate. Ho et al disclose this similar feature of wireless badges for storing information about the user. Ho et al do not teach the network security station comprising a database as is shown by Tuttle in col. 18, lines 17-48. It would have been obvious to one of ordinary skill in the art to incorporate the network security station as well as the database as Tuttle discloses in col. 18, multiple passengers are monitored at a gate by using the smart card

Art Unit: 2675

and network database for security purposes and to prevent unauthorized individuals from entering restricted areas.

As to independent claims 12 and 20, limitations of claims 1 and 8, and further comprising, and electronically displaying said badge display information on each of said plurality of electronic wireless badges (pg. 7, lines 5-20).

As to dependent claims 3, 9, 13 and 21, limitations of claim 1, 8, 12 and 20, and further comprising, a central station with several remote stations with several communications units or wireless badges. A piconet is a connection between a master and one or more slaves. Ho et al do not disclose a central station with several remote stations. Tuttle discloses in col. 17, lines 22-65 and col. 18, lines 17-48 where the main system communicates information about passengers to remote terminals at each gate of the airport. It would have been obvious to one of ordinary skill in the art to incorporate the central network security which communicates to remote terminals as in this fashion, the security is able to monitor where users are located and if they have tried to access restricted areas.

As to dependent claim 9, limitations of claim 8, and further comprising where said electronic display is adapted to display any of one of a plurality of different badge information at any one time (on pg. 3, line 35-pg. 4, line 17, and pg. 6, line 28-pg. 7, line 3).

As to dependent claim 11, limitations of claim 8, and further comprising wherein said badge information includes a photo of an authorized wearer (Fig. 1, item 16, pg. 5, lines 25-31).

As to dependent claims 14 and 22 limitations of claims 13 and 21, and further comprising wherein said badge display information displayed on each of said plurality of electronic wireless badges is different (on pg. 3, line 35-pg. 4, line 17, and pg. 6, line 28-pg. 7, line 3). Ho et al

Art Unit: 2675

disclose where different information such as proper access authorization, time of arrival or time of departure is displayed.

As to dependent claims 15 and 23, limitations of claims 13 and 21, and further comprising, authorizing said electronic wireless badges to receive badge display information (on pg. 3, line 35-pg. 4, line 17, and pg. 6, line 28-pg. 7, line 3). Ho et al disclose where different information such as proper access authorization, time of arrival or time of departure is displayed.

As to dependent claim 16 and 24, limitations of claims 13 and 21, and further comprising, altering said badge display information periodically to prevent fraud (on pg. 3, line 35-pg. 4, line 17, and pg. 6, line 28-pg. 7, line 3). Ho et al disclose where different information such as proper access authorization, time of arrival or time of departure is displayed. Also displayed would be the last updating of information about the user.

As to dependent claims 17 and 25, limitations of claims 16 and 24, and further comprising, flashing a display of said wireless badges in concert. Although Ho et al and Tuttle do not disclose where a flashing of a display at a concert, it would have been obvious to one of ordinary skill in the art that a display is capable of flashing as the flashing could indicate unauthorized entry.

As to dependent claims 18 and 26, limitations of claims 13 and 21, and further comprising, linking badge information stored in said electronic wireless badge (on pg. 3, line 35-pg. 4, line 17, and pg. 6, line 28-pg. 7, line 3).

As to dependent claims 19 and 27, limitations of claims 18 and 26, and further comprising wherein said application computer is a register checkout. Although Ho et al and Tuttle do not disclose where the application computer is a register checkout, Ho et al and Tuttle

Art Unit: 2675

disclose where the computers store information in order to enter or exit an area, time keeping, personal identification information. It would have been obvious to one of ordinary skill in the art that the application computer could have been a register checkout as the identification card could easily store information from credit cards for use at the checkout, and would be advantageous as it would enable the user to only carry one card for all purposes.

5. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ho et al (GB 2,319,747 A) in view of Bork et al (US 6,246,376).

As to dependent claim 4 limitations of claim 1, and further comprising wherein said wireless piconet front end is a BLUETOOTH device. Will does not disclose a BLUETOOTH device. Bork et al disclose in col. 2, lines 4-11 where a wireless location and direction indicator uses BLUETOOTH protocol, which permits multiple piconets to exist in, close proximity. It would have been obvious to one of ordinary skill in the art that the system of Bork et al could have been incorporated into that of Will. Will discloses a wireless system with a wireless badge using communications means for locating and subsequently sending other information to the wireless badges. Bork et al disclose a system for wireless locating for multiple devices. The piconets using BLUETOOTH is advantageous as it is capable of communicating with like communication devices to transfer identification data and either fixed or variable location data as disclosed by Bork et al.

6. Claim 10 rejected under 35 U.S.C. 103(a) as being unpatentable over Ho et al (GB 2,319,747 A) in view of Tuttle (US 6,127,917) and further in view of Bork et al (US 6,246,376).

As to dependent claim 10 limitations of claim 8, and further comprising wherein said wireless piconet front end is a BLUETOOTH device. Will does not disclose a BLUETOOTH

Art Unit: 2675

device. Bork et al disclose in col. 2, lines 4-11 where a wireless location and direction indicator users BLUETOOTH protocol, which permits multiple piconets to exist in, close proximity. It would have been obvious to one of ordinary skill in the art that the system of Bork et al could have been incorporated into that of Will. Will discloses a wireless system with a wireless badge using communications means for locating and subsequently sending other information to the wireless badges. Bork et al disclose a system for wireless locating for multiple devices. The piconets using BLUETOOTH is advantageous as it is capable of communicating with like communication devices to transfer identification data and either fixed or variable location data as disclosed by Bork et al.

Response to Arguments

7. Applicant's arguments with respect to claims 1-27 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Srilakshmi K. Kumar whose telephone number is 703 306 5575. The examiner can normally be reached on 8:00 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, xxxx xxxx can be reached on xxx xxx xxxx. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
